Software Developer with strong foundations in Python, Java, Data Structures & Algorithms, and experience building scalable full-stack applications using React, FastAPI, and MongoDB. Passionate about Artificial Intelligence and Machine Learning, with a focus on developing intelligent software solutions by combining AI technologies with modern backend engineering.

Education

Jayawantrao Sawant College Of Engineering, BE (ENTC Engineering)

2023 – 2027

- GPA: 7.7

Experience

Technical Intern, Alltius Pvt. Ltd.

Jan 2026

- Contributed to the development of the “Binnie” Smart Waste Management System by working on system design, embedded controller integration using Raspberry Pi, and implementation of control logic for automated operations.
- Collaborated with cross-functional teams to develop, test, debug and optimize scalable software-driven automation modules following engineering best practices. Assisted in system testing, troubleshooting and deployment while following software engineering best practices.

Projects

CrowdSourced Civic Sense Platform

Github

- Developed a scalable full-stack software application using React, FastAPI and MongoDB with reusable components, REST APIs and role-based authentication.
- Designed an intuitive user interface with real-time status tracking, location mapping, community engagement and role-based access for citizens and officials.

FinZer – AI-Enabled Personal Finance Platform

(Live Demo)

- Built an AI-enabled personal finance platform using React, FastAPI and MongoDB with secure JWT authentication.
- Integrated AI-powered spending analysis and budgeting assistance to deliver personalized financial recommendations.
- Developed REST APIs and responsive dashboards while ensuring scalable backend architecture.

Beatsync - Real-Time Music Sync Room App

(Live Demo)

- Developed a real-time collaborative music application using React, FastAPI and WebSockets. Implemented synchronized playback, room management and live chat using efficient client-server communication.
- Optimized frontend rendering and backend event handling to improve real-time performance.

Technical Skills

Programming: Java(Intermediate,DSA), Python, C(Basic)

Frontend: HTML5, CSS3, JavaScript(ES6), TypeScript, React.js, Next.js, Bootstrap, Tailwind

Backend & Databases: FastAPI, REST APIs, Authentication, MySQL, MongoDB

Software Engineering: OOP, Data Structures, Algorithms, Git, Problem Solving, System Design(Basic)

Data Science: NumPy, Pandas, Matplotlib, Seaborn

AI/ML: Machine Learning Fundamentals, AI Fundamentals, Data Analytics, Prompt Engineering

Tools & Platforms: Git, GitHub, Linux, VS Code, Netlify, Vercel, Figma, Render

Certifications

MongoDB: MongoDB Certified Developer

Data Analytics: CodeCamp

Udemy: Full-Stack Development, Core Java, CSS, JavaScript, Bootstrap

HackerRank: SQL Certification

Hackathons

MIT kurukshetra 2K25

- Full-stack civic engagement platform (React, FastAPI, MongoDB) for reporting issues, upvoting, tracking progress, and admin management.
